

EQUIPMENT RAIL SYSTEM

Description

PTL's equipment rail system is a wall mounted units pleasantly designed for mounting a variety of equipments and facilities at bedside, keeping the surrounding floor area uncluttered and allowing easy cleaning. As equipment is quickly attached to the rail, it may be readily moved from one location to another, avoiding duplication.

It is pleasantly designed for the mounting of periphery or direct equipment. The rail system simplifies and allows the ergonomic, space saving and rational layout of the equipment needed at the point of use.

The rail measuring 35 mm(w) x 15 mm (d) is made of heavy duty aluminium alloy extrusion with clear natural anodized finish and is connected to the wall with supports designed to cater for every type of wall such as plasterboard, brick or concrete.

The rail is designed to support a load of 120 kg/m when installed to our recommendations at a nominal mounting centre of 600 mm.

Varies of accessories can be mounted to the equipment rail system such as :

- Shelf
- Table
- Shelf and drawer
- Baskets
- Writing desk
- Monitor shelf (adjustable)
- Sphygmomanometer
- Various custom designed equipment holders
